

K-2 Farm Excursion and Duck Visit

As part of their integrated Science unit 'Watch It Grow', K-2 students have been learning about living things and how they change and grow.

Students visited the Calmsley Hill City Farm where they experienced first-hand farm life and got to interact with all the farm animals they have been learning about. It was a fun day and they have been using the knowledge they learnt in their daily class work.

Students were also extremely excited to participate in the 'Hatch n Grow' program where they observed the changes and cared for 11 little ducklings each day at school.

It has been an enjoyable unit for all students so far!
